TABLE LAMP

Classic in a modern edition

an innovative, wireless table lamp. Despite its compact size, it will surprise you with its numerous functions. This is a perfect lamp for people who value timeless style and functionality.

It has been designed with the needs of owners of gardens, coffee shops or restaurants in mind. It features a robust housing, whereas its mat finishing creates an elegant and modern design. The lamp is available in two classic colour options – black or white. Therefore, it will match many different interior arrangements.

Another advantage of the table lamp is its tightness. It can be installed both indoors and outdoors – on a terrace or in a garden.

Rain or bad weather conditions will not damage it.

With just one touch you can turn on and off, change the color of light, freely select the color of warm, neutral or cold and adjust the intensity of light. All this with just one button.

Moreover, the lamp is very convenient and easy to use. Instead of a mains power supply, it features a type C USB port, it works for up to 8 hours when fully charged. Lack of a power supply cable ensures full mobility of the lamp; therefore, it will work perfectly in places where standard devices would not. You may move it to any place quickly and comfortably.

Table lamp – selected advantages and parameters:

- IP54 protection class allows to use the lamp outside;
